

Remote and Control - Function via Ethernet for controlling of software GASCONTROL.

Benefits

- login via password
- same function like GASCONTROL program in the gas mixer
- same readout and menu navigation on display
- for using no relearning required
- quality control by means of data recording and storing
 - date and time
 - user (name or examiner)
 - process data tracing
- export data interface for further interpretation of measured data in MS EXCEL®
 - import data from program to the unit
 - product data
 - administration of user names inclusive access code
- starting of remote and control function by standard internet browser
- multilingual (depending on gas mixer control)

Retrofit upon request.
